DETAILED ACTION

Page 2

- 1. Applicant's amendment filed 10/18/04 has been entered and made of record.
- 2. Applicant's arguments, see last four lines of page 2 to page 3 line 11, filed 10/18/04, with respect to claims 1, 3-4, 7-10, 22, 24, 26, 28, 30, 32, 34 and 37-38 have been fully considered and are persuasive. The rejection of claims 1, 3-4, 7-10, 22, 24, 26, 28, 30, 32, 34 and 37-38 has been withdrawn.
- 3. Claims 1-39 are allowed.
- 4. The following is a statement of reasons for the indication of allowable subject matter:

Regarding claims 1, 22, 24, 26, 28, 30, 32, 34, and 37-38, the closet cited prior art (Rao) fails to teach or suggest the "transmission signal generating portion for adding a synchronous signal that includes at least either a horizontal synchronous signal, a vertical synchronous signal, or a sequential synchronous signal." Dependent claims 3-4, 7-10, 28 are also allowed for the same reasons as above.

Regarding claim 2, the cited prior art (Rao) fails to teach or suggest the features of "wherein said encoding portion encodes each pixel value of the original picture signal a plurality of times, and wherein said uniformly random number generating portion generates a different uniformly random number for encoding each pixel value of the original picture signal a plurality of times". Claims 5-6 are also allowed as being dependent upon the allowed base claim 2.

Regarding claim 11, the cited prior art (Rao) fails to teach or suggest the features of "a cumulating portion for cumulating the encoded values of the encoded picture signal for each pixel of the original picture, a decoding portion for decoding the encoded values cumulated by said cumulating portion for each pixel value of the original picture signal based on the number of

times counted by a counting portion, and a sampling portion for sampling the encoded values of the encoded picture signal". Claims 18-21 depend from claim 11 and are also allowed for the same reasons as above.

Regarding claim 12, the cited prior art fails to teach or suggest the features "a cumulating portion for cumulating the encoded values of the encoded picture signal for each pixel of the original picture, a decoding portion for decoding the encoded values cumulated by said cumulating portion for each pixel value of the original picture signal based on the number of times counted by a counting portion, a sampling portion for sampling the encoded values of the encoded picture signal, wherein said cumulating portion cumulates the encoded values sampled by said sampling portion". Claim 13 is allowed as being dependent upon the allowed base claim.

Regarding claim 14, the cited prior art fails to teach or suggest the features of "a controlling portion for causing said cumulating portion to stop cumulating the encoded values".

Claims 15-17 are also allowed as being dependent upon the allowed base claim.

Regarding claims 23 and 25, the cited prior art (Rao) fails to teach or suggest the features of "counting the number of times cumulated at the cumulated step".

Regarding claim 27, it is noted that claim 27 recites the features called for in claim 2. Thus, claim 27 is also allowed for the same reasons as set forth in claim 2 above.

Regarding claims 29, 31, 33, 35-36, and 39, the cited prior art (Rao) fails to teach or suggest the features of "a counting portion for counting the number of times cumulated".
